## **Customer Reviews**

If your kids are naturally strong in language skills, this is probably a great review for them. My kids are not. They love math and science, but language... no. I started them out with these Daily Language Review books, and that was a mistake. These books don't actually teach any one skill. Each day has a few different activities: spelling, punctuation, grammar, whatever, with just a few questions of each. So for a kid who has strong language skills, this would be great, not too much boring repetition. My kids, however, need each skill thoroughly outlined and instructed and

practiced. This book was frustrating and mind-boggling to them.

With educational and testing standards getting more and more difficult, it is nice having a tool to provide students with practice with language arts skills. These Daily Language Practice sheets give 1st graders a daily dose of basic editing (adding capitals, basic spelling errors, punctuation). They also include a variety of other activities including sorting words, yes/no questions, rhyming words, and other fundamentals. The Friday sheet always has a different and more lighthearted activity. There is also a Daily Math Practice book and I xerox them back to back and use them as bellwork. Both are half-sheets which are completed in about 10 minutes. Highly recommended!

The books offers a review for many skills children should know. It's a usefully tool to begin class with and have children review what they know. There are questions for each day of the week for a 36 week school year. It has helped my students review concepts they have learned.

I have used extensive grammar and language texts with schoolchildren. And they would hate it! Now I use this book and it is rather quick, efficient, and to the point. The children enjoy their sessions as they learn. You can have them practice handwriting as well as grammar and punctuation. It is really great.

Great daily review. I used them all last year for morning work. They are only half of a sheet of paper for each day and 5 questions each day. They don't take a lot of time (if you were looking for more filler). They go along with 1st grade standards well. I did not use the progress charts at the end of each week (children mark how many they got right for each day on a graph).

This book is organized by day of the week (M-F) for each lesson. The lessons progress nicely at a very good pace, just a bit ahead of my daughter's 1st grade curriculum. It serves as both a review and daily practice for her. The lessons are also self-explanatory so my daughter can do the lesson all by herself and have me check it. At the end of each lesson is a progress table to show how many (problems) the child has done correctly. Overall a very well organized and fun book. I highly recommend it.

We really love all the daily review books- they offer a fun variety of skills, without being boring, but offering the repetition it takes to for a skill to stick. I especially love using these books with my kids

with a shorter attention span.

This workbook alternates from being overly repetitive to suddenly introducing new and advanced language concepts without using a gradual introduction. I took the time to fill in where the book was lacking, but my child and I found the inconsistency wearing. In addition, considering that I paid more for this workbook than any of the others I ordered, I do not recommend it.
