# A Practical Guide To Laser Procedures

## Synopsis

This fourth volume in the highly regarded Cosmetic Procedures series provides step-by-step instruction for treating sun-damaged skin and other common aesthetic complaints using laser and light technologies. From equipment and patient selection to combining laser treatments with other cosmetic procedures for enhanced outcomes, this illustrated reference offers valuable procedural guidance regardless of your experience level. A Practical Guide to Laser Procedures delivers information essential for achieving high patient satisfaction and successfully performing cosmetic laser treatments. Look at all you'll discover! Quickly gain skill and confidence in the treatment of sun-damaged skin, wrinkles, pigmented and vascular lesions, hair and tattoo removal. Full-color design and illustrations boost understanding of each procedure. Photographs of clinical endpoints clearly show what changes to look for on the skin with laser treatments. Step-by-step instructions guide you through each procedure to rapidly acquire skill. Detailed coverage of relevant anatomy, indications and contraindications, patient selection, procedure preparation, treatment techniques and practical tips, before and after treatment photographs, and areas to be avoided to help improve outcomes and minimize complication risks. Accompanying videos of procedures assist visual learning.

## Customer Reviews

Dr. Small has created a very readable, well referenced, delightfully complete and unbiased opus on Laser and Light. This textbook is current, easy to navigate and has copious pictures and diagrams,

well developed patient education sheets, consents and procedure flow sheets. The physics, histology, tissue interactions and safety of each laser treatment and wavelength are presented in a sensible manner that serves as a great reference for neophytes and more experienced laser practitioners alike. The videos on the ebook are well filmed and offer a wealth of insight. I regularly recommend this book to my students and staff. In full disclosure, yes, I am a bit of a nerd and I enjoyed reading every well laid out page. :-)

Congratulations Dr Small, and many thanks for this much needed addition to our library!

Ed Zimmerman, MD Medical Director Las Vegas Laser & Lipo;  
President of the American Board of Laser Surgery, Inc.

Fabulous book for physicians and aesthetic RN's, covers a wide variety of laser procedures with information I haven't been able to find in other laser reference books. I appreciate the attention to detail. Up to date information, the illustrations were helpful. I recommend this book!

This text is masterfully written and will become a classic in the field. The quality of the many illustrations is also outstanding. This is the ideal text for anyone entering the field; but browsing it will also be a pleasure for the experienced reader. It is a highly recommended "practical" textbook.

Excellent overview of light/tissue interaction. Laser technology is changing quickly and this is the most up-to-date text that I have found. The other books in the series are excellent as well.

Perfect for my needs.
